## **Personal Projects:**

⇒ **SafeChat** [WIP] – A Realtime Web Based Chat App with a full-fledged custom REST API. Written in JavaScript with NodeJS Backend. Powered by WebSocket, Firebase's Realtime Database and Firestore.

Client - [github.com/harshbanjare/sc-e2ee-client](https://github.com/harshbanjare/sc-e2ee-client)

Backend - [github.com/harshbanjare/sc-e2ee-api](https://github.com/harshbanjare/sc-e2ee-api)

⇒ **SUSNews** – A JavaScript based web service that automatically fetches the current top news and creates dynamic graphics and stitches it together into a MP4 video with a highly natural Text-To-Speech voiceover on top. TTS powered by AMAZON Polly and Azure TTS.

GitHub - [github.com/harshbanjare/susnews](https://github.com/harshbanjare/susnews)

⇒ **Hashify** – A full-fledged web-based music streaming app with an interface clone of Spotify. Powered By LAMP Stack.

GitHub - [github.com/harshbanjare/hashify](https://github.com/harshbanjare/hashify)
